Summary

Astrophysicist specialized in the study of transient and high-energy events through interferometric radio observations, mainly using the Very Long Baseline Interferometry (VLBI) technique. During the last years has led the precise localizations of Fast Radio Bursts, leading the first, and to date only, localizations of these events performed on the milliarcsecond level. Since 2015 has led ten per-reviewed articles (including one in *Nature*), and has contributed to another 34 ones (including 4 *Nature*, 2 *Science*, and 2 *Nature Astronomy*). Has also submitted 16 telegrams, six of them as first author, and obtained over 3 600 hours of observing time, over 640 h of them as Principal Investigator.
